Since the program began in 2011, over 200 Teaching Gardens have been funded across the country.

Children who participate in gardening programs report that they prefer vegetables more after the program than before.**

**Lineberger SE, Zajicek JM. Hort Technology 2000: 10:3:593-596

Children who participate in gardening programs may be more likely to eat vegetables.*

Share photos of your Teaching Garden, the garden’s harvest, and those who help support the garden on Instagram with the hashtag #TGHarvest

Since the program began in 2011, over 200 Teaching Gardens have been funded across the country.
